

Analysis and Prediction of the Effect of Stroke Prediction with Improved Accuracy using Medium Tree and Coarse Gaussian SVM classifiers

This project focuses on predicting stroke risk using machine learning techniques. Medium Tree and Coarse Gaussian SVM classifiers were developed and evaluated using healthcare data to support early stroke detection.

RESULTS

Fig. 1. Mean Accuracy Comparison

Independent Samples t-Test

GROUP	N	MEAN	STD. DEVIATION	STD. ERROR MEAN
<i>FINE TREE</i>	20	62.6500	0.59161	0.13229
<i>COARSE GAUSSIAN SVM</i>	20	35.4500	0.59161	0.13229
